The Jeita Grottoes are a system of two separate, but interconnected, limestone caves spanning an overall length of nearly 9 kilometers (5.6 mi). Though inhabited in prehistoric times, the lower cave was not rediscovered until 1836 by Reverend William Thomson; it can only be visited by boat since it channels an underground river that provides fresh drinking water to more than a million Lebanese. In 1958, Lebanese speleologists discovered the upper galleries 60 meters (200 ft) above the lower cave which have been accommodated with an access tunnel and a series of walkways to enable tourist's safe access without disturbing the natural landscape. The upper galleries house the world's largest known stalactite. The galleries are composed of a series of chambers the largest of which peaks at a height of 120 meters (390 ft). Aside from being a Lebanese national symbol and a top tourist destination, the Jeita grotto plays an important social, economic and cultural role in the country. It was one of top 14 finalists in the New 7 Wonders of Nature competition.</p> <p>Proceed to visit Harissa, Our Lady of Lebanon being one of the most important shrines in the world honoring the Virgin Mary. The shrine is highlighted by a huge, 15-ton bronze statue of the Immaculate Conception, Mother of God. It is 8.5 m high, and has a diameter of five meters. The Virgin Mary stretches her hands towards Beirut. The shrine of Our Lady of Lebanon draws millions of faithful both Christians and Muslims from all over the world. The 50th jubilee in 1954 was also the hundredth anniversary of the establishment of the Immaculate Conception. During these Jubilee celebrations, Pope Pius XII sent his representative, Cardinal Angelo Roncalli to Lebanon, the later Pope John XXIII. Pope John Paul II visited Our Lady of Lebanon in 1997.</p> <p>In Harissa we can take a ride by the famous cable car down towards Jounieh's city, overlooking its spectacular Bay View.</p> <p>On the way we will visit Byblos City a Mediterranean city in the Mount Lebanon Governorate.</p> <p>It is believed to have been occupied first between 8800 and 7000 BC.
